

Docket No. AUS000195US1

ABSTRACT OF THE DISCLOSURE

**METHOD AND SYSTEM FOR INCORPORATION OF GRAPHICAL PRINT
TECHNIQUES IN A WEB BROWSER**

5

A web browser application program provides graphical
print techniques, which allow the user to control how a
web page is presented. The data processing system, under
instruction of a program, responds to an instruction by
10 the user to present a selected portion of a first
document by creating a new document from the first
document including the header, trailer, and the selected
portion. The data processing system responds to an
instruction by the user to change the font size of a
15 selected portion of the first document by creating a copy
of the first document and modifying or inserting font
tags within the copy of the document. The data
processing system responds to an instruction by the user
to present the first document with page break indicators
20 by creating a copy of the first document and inserting
page break indicators within the copy to be presented to
the user. The graphical print techniques may also be
used together.
